

HAICI YANG

haici.yang@gmail.com
<https://haiciyang.github.io/>

Sr. Researcher @ Dolby
Atlanta, Georgia

Audio Coding, Speech Generation, Music Source Separation, Spatial Audio

EDUCATION

PhD	Indiana University Bloomington, IN. Intelligent System Engineering Advised by Professor Minje Kim	2019 – Current
MS	Peking University Beijing, China Informatics Advised by Professor Jun Wang in KVision Digital Library Lab.	2017 – 2019
BS	Beijing Normal University Beijing, China Information System; Minored in Psychology GPA 4.2/5; Graduated with Honor	2013 – 2017

WORK EXPERIENCE

Dolby Laboratories. <i>Senior Foundational AI Researcher. Atlanta, GA</i>	June 2025 – Current
Mitsubishi Electric Research Lab (MERL) <i>Research Intern, Cambridge, MA</i> • Supervisor: Gordon Wichern • Generative speech enhancement [C-10] and Anomaly Sound Detection [C-9]	July 2024 – Feb 2025
Indiana University <i>Research Assistant, Bloomington, IN</i> • Supervisor: Minje Kim • Project 1: Source-aware neural codec targeting the mixture signal coding problem. Work published [C-2]. • Project 2: End-to-end music remixing model that jointly optimizes remixing and source separation tasks. Work published [C-3]. • Project 3: Low-latency predictive neural codec. Work published [C-4]. • Project 4: Generative neural audio codec. Work published [C-6, C-7]. Journal extension in progress.	Jan 2021 – Current
Adobe Research <i>Research Intern. San Francisco, CA</i> • Supervisor: Jiaqi Su, Zeyu Jin • Project: Generative speech enhancement on discrete speech tokens. Work published [C-8].	Jun 2023 – Dec 2023
Microsoft – Microsoft Research Asia <i>Research Intern. Beijing, China</i>	Nov 2022 – Mar 2023

- Supervisor: Xiulian Peng
- Project: Speech coding.

Amazon.com, Inc – Lab126

Summer 2021

Applied Scientist Intern. Cambridge, MA

- Supervisor: Wontak Kim, Sanna Wager, Spencer Russell
- Project: Blind stereo-to-5-channel up-mixing involving spatial image and musical content disentanglement. Work published [C-4].

Amazon.com, Inc - Alex Speech Team

Summer 2020

Applied Scientist Intern. Sunnyvale, CA

- Supervisor: Oguz Elibol, Hongda Mao
- Project: An overview of the state-of-the-art speaker recognition model and exploring the application of Non-local Convolutional Neural Networks (NLCNN) in the speaker recognition problem.

Cyberinfrastructure Network Science Center

Aug 2018 – Mar 2019

Research Assistant. Bloomington, IN

- Supervisor: Katy Borner
- Project: Mapping the co-evolution of artificial intelligence, robotics, and the Internet of Things over 20 years through keyword detection, network analysis, and visualization. Work published [J-1]

WWF China

Summer 2018

Analyst Intern. Beijing China

- Website design and development for the Human Resource Team.

Nielsen

Summer 2016

Analyst Assistant. Beijing China

- Data-driven user study reports produced for the Telecom Team

PUBLICATIONS

Conference Papers

Patents

[P-4] Method and apparatus for encoding/decoding neural network-based personalized speech. US Patent App. 18/886,296.

[P-3] Method and device for encoding/decoding audio signal based on dequantization through potential diffusion. US Patent App. 18/886,765.

[P-2] Speech coding method and apparatus for performing the same. US Patent App. 18/474,997.

[P-1] Methods of encoding and decoding speech signal using neural network model recognizing sound sources, and encoding and decoding apparatuses for performing the same. US Patent App. 17/326,035

TEACHING EXPERIENCE

Indiana University, Bloomington, IN

Fall 2019

Associated Instructor

- ENGR-E533 Deep Learning System
